MUJTABA M.

Front-End Software Engineer

✉ mujtmurt@gmail.com ☎ +971 50 126 7600 🔗 mujs.dev ⬛ github.com/mujsdev

ABOUT

I started out as a left brainer and enjoyed coding using Java and MySQL in the early days of high school. Couple years later I developed an addiction for web design and I'm enthusiastic about making designs look and feel good through front-end development.

I'm a cheerful person with decent marketing skills. I fancy teaching and learning anything website related (you should check out my IG @mujs.dev). In my spare time, I sleep, drink water, and hunt for trophies on my PS5.

WORK EXPERIENCE

Senior UX Engineer @ Mamo
Nov 2022 – Present // Hybrid, UAE

- Lead design system discussions across customer and business squads.
- Fully design and develop emails for the Growth team. Both, BAU and one-time off.

UX Engineer @ Mamo
Jul 2021 – Nov 2022 // Hybrid, UAE

- Leveraged the power of SCSS to build an atomic design system to redesign the Mamo Pay for Business dashboard.
- Cleared technical debt by transitioning codebase from pure HTML to maintainable and reusable React components.
- Revamped entire website leveraging Webflow's no-code features.
- Design (occasionally) and build either BAU (business as usual) or one-time off emails for growth/marketing teams.
- Collaborate with different teams of engineers, product designers and managers on a daily basis.

Frontend Developer @ IEDEA
Nov 2020 – Jun 2021 // Remote, UAE

- Maintaining IEDEA's website by doing some minimal housekeeping using PHP and HTML.
- Designed and developed a microsite using Next.js and Tailwind CSS.

Frontend Developer @ SMART IEDEA
Nov 2020 – Jun 2021 // Remote, UAE

- Created visually rich virtual environments provided by 3D designers using the meetyoo platform for clients such as Dubai Cares (RewirEdX), Tristar (Safety at Sea), ABLF (ABLF Talks Live).
- Ran 8-hour virtual live events by changing rooms, communicating with users by sending live notifications for their next sessions.
- Maintaining SMART IEDEA's website by doing some minimal housekeeping using PHP and HTML.

Web Developer @ IUPUI Division of Undergraduate Education
Dec 2018 – Aug 2020 // Indianapolis, IN, USA

- As part of the web team, communicated with other business units to manage and design content using WCMS (Web Content Management System) across 50+ websites.
- Plan, design, and send emails using Salesforce and Mailchimp to 20,000+ students and staff across campus.
- Created a custom digital signage using PHP and HTML displaying upcoming events across 15+ screens across campus
